Essential Human Virology By Jennifer Louten

Essential Human Virology is written for the undergraduate level with case studies integrated into each chapter. The structure and classification of viruses will be covered, as well as virus transmission and virus replication strategies based upon type of viral nucleic acid. Several chapters will focus on notable and recognizable viruses and the diseases caused by them, including influenza, HIV, hepatitis viruses, poliovirus, herpesviruses, and emerging and dangerous viruses.

Additionally, how viruses cause disease, or pathogenesis, will be highlighted during the discussion of each virus family, and a chapter on the immune response to viruses will be included. Further, research laboratory assays and viral diagnosis assays will be discussed, as will vaccines, anti-viral drugs, gene therapy, and the beneficial uses of viruses. By focusing on general virology principles, current and future technologies, familiar human viruses, and the effects of these viruses on humans, this textbook will provide a solid foundation in virology while keeping the interest of undergraduate students.

- Focuses on the human diseases and cellular pathology that viruses cause
- Highlights current and cutting-edge technology and associated issues
- Presents real case studies and current news highlights in each chapter
- Features dynamic illustrations, chapter assessment questions, key terms, and summary of concepts, as well as an instructor website with lecture slides, test bank, and recommended activities

Editorial Review

About the Author

Jennifer Louten received her doctoral degree from Brown University Medical School, where she investigated the cellular targets of infection and the induction of type 1 interferons following infection with lymphocytic choriomeningitis virus. Dr. Louten is currently an associate professor of biology at Kennesaw State University, where she has served as a Teaching Fellow and developed courses in virology, biotechnology, immunology, and cell culture techniques. She is presently the biotechnology program coordinator and the director of a scholarship program sponsored by a National Science Foundation grant. She is the recipient of a Kennesaw State University Outstanding Early Career Faculty Award and the Student Government Association's Faculty of the Year Award. Before becoming a professor, Dr. Louten performed research in drug discovery at Schering-Plough Biopharma (currently Merck Research Laboratories). She received her Bachelor of Science in biotechnology from the Rochester Institute of Technology.

Users Review

From reader reviews:

Katherine Sorenson:

Do you have something that you like such as book? The reserve lovers usually prefer to select book like comic, brief story and the biggest one is novel. Now, why not striving Essential Human Virology that give your fun preference will be satisfied by reading this book. Reading addiction all over the world can be said as the means for people to know world better then how they react when it comes to the world. It can't be mentioned constantly that reading behavior only for the geeky person but for all of you who wants to end up being success person. So , for all you who want to start studying as your good habit, you can pick Essential Human Virology become your personal starter.

Annie Adcock:
