Editorial Review

Review

"This text is a very good intermediate level book focusing on the clinical presentation, diagnosis, and management of both hematologic and oncologic disorders observed in children. The combination of text, tables, and outlined material makes the information easy to access. It provides a handy text for pediatricians caring for both hematologic and oncologic problems. It also is particularly suitable for pediatric students and residents. The comprehensive tables of normal values in infants and children at the end of the text are very useful."

- Marshall Lichtman, URMC, Rochester (2005)

From the Back Cover

This revised manual is a concise, practical, up-to-date book for practitioners responsible for the care of children with hematologic and oncologic disease. It is specifically designed for medical students, pediatric house staff, fellows in pediatric hematology-oncology seeking a systematic approach to these diseases and a guide in preparation for board examinations, and practicing hematologists and oncologists seeking another opinion and an approach to the diagnosis and management of these disorders. The **Manual of Pediatric Hematology and Oncology, Third Edition**, is replete with detailed tables, flow diagrams and algorithms for investigation and clinical management of these diseases. It is currently the only book to combine hematology and oncology in one volume.

Key Features

- * Reflects a uniform, systematic approach to diagnosis and management of hematologic and oncologic diseases in children
- * Features numerous tables, flow diagrams, protocols and algorithms for easy access to clinical information
- * Designed as a concise, easy-to-use guide for medical students, residents, fellows, pediatric hematologists/oncologists and pediatric nurses and nurse practitioners
- * Includes recent developments in molecular genetics, cytogenetics, immunology, transplantation, and biochemistry to the extent that they have bearing on clinical practice

About the Author

Dr. Philip Lanzkowsky was born in Cape Town on March 17, 1932 and graduated high school from the South African College and obtained his MB ChB degree from the University of Cape Town School of Medicine in 1954 and his Doctorate degree in 1959 for his thesis on Iron Deficiency Anemia In Children. He completed a pediatric residency at the Red Cross War Memorial Children's Hospital in Cape Town in 1960. After working in Pediatrics at the University of Edinburgh and at St Mary's Hospital of the University of London, Dr. Lanzkowsky did a pediatric Hematology-Oncology fellowship at Duke University School of Medicine and at the University of Utah.

In 1963 he was appointed Consultant Pediatrician and Pediatric Hematologist to the Red Cross War Memorial Children's Hospital at the University of Cape Town and introduced Pediatric Hematology and Oncology as a distinct discipline. In 1965 he was appointed Director of Pediatric Hematology and Associate Professor of Pediatrics at the New York Hospital-Cornell University School of Medicine.

In 1970 he was appointed Professor of Pediatrics and Chairman of Pediatrics at Long Island Jewish Medical Center and established a division of Pediatric Hematology-Oncology which he directed until 2000. He was

the founder of the Schneider Children's Hospital, which he developed, planned, and was the hospital's Executive Director and Chief of Staff from its inception in 1983 until 2010.

Dr. Lanzkowsky has received numerous honors and awards and has lectured extensively at various institutions and medical schools in the United States and around the world. In addition to having been the author of five editions of the Manual of Pediatric Hematology and Oncology used by clinicians worldwide, he is the author of *How It All Began: The History of a Children's Hospital* and over 280 scientific papers, abstracts, monographs, and book chapters.

Dr. Lanzkowsky's medical writings have been prodigious. His seminal contributions to the medical literature have included the first description of the relationship of pica to iron-deficiency anemia (*Arch. Dis Child.*, 1959), Effects of timing of clamping of umbilical cord on infant's hemoglobin level (*Br. Med. J.*, 1960), Normal oral D-xylose test values in children (*New Engl. J. Med.*, 1963), Normal coagulation factors in women in labor and in the newborn (*Thromboses at Diath. Hemorr.*, 1966), Erythrocyte abnormalities induced by malnutrition (*Br. J. Haemat.*, 1967), Radiologic features in iron deficiency anemia (*Am. J. Dis. Child.*, 1968), Isolated defect of folic acid absorption associated with mental retardation (*Blood*, 1969; *Am. J. Med.*, 1970), Disaccharidase levels in iron deficiency (*J. Pediat.*, 1981) and Hexokinase "New Hyde Park" in a Chinese kindred (*Am. J. Hematol.*, 1981).
