That package includes ISBN-10: 0321929152/ISBN-13: 9780321929150 and ISBN-10: 0133905527 /ISBN-13: 9780133905526 .

Master Microbiology where it matters. Everywhere.

An engaging and clear approach to learning complex microbiology topics and theory

Praised for its exceptionally clear presentation of complex topics, this #1-selling text for microbiology non-majors provides a careful balance of concepts and applications, proven art that teaches and the most robust, dynamic media in MasteringMicrobiology. The **Twelfth Edition** of Tortora, Funke, and Case's **Microbiology: An Introduction** focuses on big picture concepts and themes in microbiology, encouraging students to visualize and synthesize tough topics such as microbial metabolism, immunology, and microbial genetics. The text and accompanying resources also help students make connections between microbiology theory and disease diagnosis, treatment, and prevention.

Also available with MasteringMicrobiology

MasteringMicrobiology is an online homework, tutorial, and assessment resource that helps students quickly master concepts and improve course results. Students benefit from self-paced tutorials that feature immediate wrong-answer feedback and hints that emulate the instructor office-hour experience to help keep students on track. With a wide range of interactive, engaging, and assignable activities, students are encouraged to actively learn and retain tough course concepts.

Editorial Review

About the Author

Gerard J. Tortora is a professor of biology and teaches microbiology, human anatomy, and physiology at Bergen Community College in Paramus, New Jersey. He received his M.A. in Biology from Montclair State College in 1965. He belongs to numerous biology/microbiology organizations, including the American Society of Microbiology (ASM), Human Anatomy and Physiology Society (HAPS), American Association for the Advancement of Science (AAAS), National Education Association (NEA), New Jersey Educational Association (NJEA), and the Metropolitan Association of College and University Biologists (MACUB). Jerry is the author of a number of biological science textbooks. In 1995, he was selected as one of the finest faculty scholars at Bergen Community College, and was named Distinguished Faculty Scholar. In 1996, Jerry received a National Institute for Staff and Organizational Development (NISOD) excellence award from the University of Texas and represented Bergen Community College in a campaign to increase awareness of the contributions of community colleges to higher education.

Berdell R. Funke received his Ph.D., M.S., and B.S. in microbiology from Kansas State University. He has spent his professional years as a professor of microbiology at North Dakota State University. He taught introductory microbiology, including laboratory sections, general microbiology, food microbiology, soil microbiology, clinical parasitology, and pathogenic microbiology. As a research scientist in the Experiment Station at North Dakota State, he has published numerous papers on soil microbiology and food microbiology.

Christine L. Case is a registered microbiologist and a professor of microbiology at Skyline College in San Bruno, California, where she has taught for the past 44 years. She received her EdD. in curriculum and instruction from Nova Southeastern University and her M.A. in microbiology from San Francisco State University. She was Director for the Society for Industrial Microbiology (SIM). She received the ASM and California Hayward outstanding educator awards. In addition to teaching, Chris contributes regularly to professional literature, develops innovative educational methodologies, and maintains a personal and professional commitment to conservation and the importance of science in society. Chris is also an avid photographer, and many of her photographs appear in this book.

Users Review

From reader reviews:

Walter Johnson:

The e-book untitled Microbiology: An Introduction is the e-book that recommended to you to read. You can see the quality of the publication content that will be shown to anyone. The language that publisher use to explained their ideas are easily to understand. The article writer was did a lot of exploration when write the book, so the information that they share to you is absolutely accurate. You also might get the e-book of Microbiology: An Introduction from the publisher to make you a lot more enjoy free time.

Nellie Wellborn:

Playing with family in a park, coming to see the sea world or hanging out with good friends is thing that usually you could have done when you have spare time, and then why you don't try thing that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Microbiology: An Introduction, it is possible to enjoy both. It is fine combination right, you still desire to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't understand it, oh come on its referred to as reading friends.

Hope Giles:

This Microbiology: An Introduction is great reserve for you because the content that is certainly full of information for you who else always deal with world and have to make decision every minute. This specific book reveal it facts accurately using great arrange word or we can declare no rambling sentences within it. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but tricky core information with attractive delivering sentences. Having Microbiology: An Introduction in your hand like obtaining the world in your arm, information in it is not ridiculous 1. We can say that no e-book that offer you world throughout ten or fifteen second right but this publication already do that. So , it is good reading book. Hey Mr. and Mrs. stressful do you still doubt this?

James Pitts:

In this period of time globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. The actual book that recommended to your account is Microbiology: An Introduction this publication consist a lot of the information from the condition of this world now. This book was represented just how can the world has grown up. The words styles that writer value to explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book ideal all of you.
