**Drug Calculations: Ratio and Proportion Problems for Clinical Practice, 9e (Drug Calculations Companion)** By Meta Brown RN Med, Joyce L. Mulholland MS RN ANP MA

Covering the ratio and proportion method of drug calculations, **Drug Calculations: Ratio and Proportion Problems for Clinical Practice, 9th Edition** provides clear, step-by-step explanations and concise examples to ensure safety and accuracy. Unique to this book, a "proof" step in the answer key lets you double-check your calculation results to avoid medication errors. Safety is also addressed through the inclusion of Quality & Safety Education for Nurses (QSEN) information and with features such as *Clinical Alerts* and *High Alert* drug icons calling attention to situations in actual practice that have resulted in drug errors. Written by Meta Brown Seltzer and Joyce Mulholland, this text includes extensive hands-on practice with calculation problems, critical thinking exercises, worksheets, and assessment tests. And to boost your proficiency, a companion Evolve website adds more than 600 additional practice problems.

- **The ratio and proportion method** provides a logical, accurate, and consistent method of drug calculation.
- **Step-by-step format for each problem** includes a unique "proof" step in the answer key to ensure that you understand the solution.
- **Clinical Alerts** highlight potential and common drug calculation errors.
- **Critical thinking exercises** help you apply analytical skills and drug calculations to clinical practice.
- **A patient safety chapter** enhances your understanding of drug labels, medication administration forms, and physician's order forms.
- **Over 1,100 practice problems** offer the extensive practice you need to become proficient in drug calculations.
- **Multiple-choice worksheets** within each chapter help you prepare for the NCLEX examination.
- **Worksheets** follow each chapter section for additional practice and application of drug calculations.
- **Chapter Finals and a Comprehensive Final** let you evaluate your mastery of drug calculations.

- **Current recommendations from The Joint Commission and the Institute for Safe Medication Practices** help reduce medication errors and promote patient safety.
- **Quality & Safety Education for Nurses (QSEN) information** highlights ways to reduce medication errors.
- **A high-risk medication icon** calls attention to medications that have the most potential to cause harm to patients.
- **Updated, full-color drug labels and equipment photos** (including pumps and IV equipment) show what you will encounter in the clinical setting.
