[ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes By Andrew Michler

The evolution of contemporary environmental architecture has outstripped simple labels. A deeper pattern is emerging where the world's most innovative buildings are a response to place. They resolve the complex intertwining of the site, people and environment, providing a provocative observation of the future of architecture. By starting with the site these projects maximize the natural and cultural resources available and are humancentric.

The book explores firsthand how Spain Wraps commercial buildings, Japan Condenses micro homes and Australia Unfolds aggressive design solutions in a climate of extremes. Germany, Cascadia, Denmark, and Mexico are also featured. 30 selected projects provide the antidote to the legacy of the modernist movement of generic, technology driven built environments.

Illuminating and often surprising conversations with renowned architects on their work reveals the process and promise of hyperlocalized design which folds bold visions into low impact and unexpected buildings. Their contemporary wisdom of site responsive design offers an unprecedented insight into architecture's new place in a changing climate.

[ours] Hyperlocalization of Architecture includes:

- **Groundbreaking architecture theory**
- **Extensive interviews with world's thought leaders of environmental architecture**
- **264 Pages**
- **350 full color photographs**
- **Online project index with details and multimedia at hyperlocalarch.com**

Interviews and Projects by: Studio 505 | PHOOEY Architects | William McDonough + Partners | KUD Architects | Berta Barrio Arquitectos | Francis-Jones Morehen Thorp. | Unemori Architects | Andrew Maynard Architects | Edward Mazria | Peter Busby Perkins+Will | Sean Godsell | Canvas Arquitectos |

Dr. Wolfgang Feist | DesignInc | Hassell Studios | Kavellaris Urban Design |
Lederer + Ragnarsdottir + Oei | Casey Brown Architecture | A.L.X. Architects |
BIG | Yasuhiro Yamashita | Miller Hull | KMD Architects | MPR Design Group |
Schemata Architecture | Coll-Barreu Arquitectos | Voluar Architecture | Durbach
Block Jagger | Ramón Fernández-Alonso Arquitect

"This is all based on human creativity, and the ability for us to advance and continuously improve with freedom from the remote tyranny of bad design. That's why the cultural question becomes interesting because at that point the culture can express itself in a creative way. It still has integrity because you're expressing yourself creatively within a context. Your solving for rich, local problems. All sustainability, like politics is local. It has to be." - William McDonough in [ours]

Editorial Review

Review

"This is why Andrew Michler's concept of hyperlocalization is so fascinating and valuable. Because every building he shows is not only a product of its climate and its environment, but of its history, its culture, a reflection of the personalities of the people who built it and surround it." - *from the foreword by Lloyd Alter, Professor of Sustainable Design at Ryerson University, editor of TreeHugger.com*

"Cactus won't thrive in Minnesota, and mangroves don't flourish in Arizona. But the same damned building dominates the cityscape everywhere. As Andrew Michler makes clear in this wonderful book, that is spherically senseless. Buildings designed for their particular site can be ultra-efficient, beautiful, wondrously varied, and deeply resilient." - **Denis Hayes**, President Bullitt Foundation, Founder of Earth Day

"I recommend it to anyone who wants a richer understanding of what's going on, globally, in architecture. Michler's ability to deftly connect the dots across disciplines results in insights which are both smart and fun. What Michler's book finally shows us is that the world of architecture is pluralistic and dispersed, and it's at the beginning of a really important revolution; this is really exciting stuff." - **Anthony Denzer**, Author of *The Solar House*, Associate Professor of Architectural Engineering at the University of Wyoming

"the book can be seen as a contemporary experimental guide for the future designers and produces different approaches to 'ordinary architecture' with regional sources or materials. (it) defines a new way of producing through provocative rules and limitations, removing all ambiguity about sustainable architecture. when michler's research studies and experimental works are put under the scope, it seems that he is exactly the right person to write this book." - *designboom*

"*Hyperlocalization of Architecture* is a new, fresh and uber-contextual book." - **World Architecture Community**

"In his forthcoming book, *Hyperlocalization of Architecture*, author and Passive House consultant Andrew Michler turns his lens to contemporary architecture, but his focus is on a very timeless concept." - **Curbed**

"Michler's keen analysis provides a new insight into each design in a way that illuminates the design lessons hidden within." - **Eric Corey Freed**, Architect & Author of *Green Building and Remodeling For Dummies*, Vice President, International Living Future Institute

"[ours] *Hyperlocalization of Architecture* brilliantly delves into contexts and operations which is what an architecture of sustainability is made up of. Reflecting on design, not flair, Michler perfectly inhabits design -if we redefine the word to indicate logic engaging with the environment. In so doing, he generates new powerful classifications of 'locale'." - **Mitchell Joachim**, Professor NYU and Co-Founder, *Terreform ONE*

From the Back Cover

The promise of environmental architecture is here. An extensive pattern is emerging, where the most innovative of contemporary building design is a response to place. Instead of overcoming nature and supplanting cultural acumen, hyperlocal architecture embraces the complex intertwining of the site, people

and environment.

Explore firsthand how Spain Wraps commercial buildings, Japan Condenses micro homes and Australia Unfolds aggressive design solutions in a climate of extremes. Journey to Cascadia, Germany, Denmark, and Mexico to witness how buildings are inspired by and challenge the potential of the places we inhabit. With some of the most renowned sustainable architects and thinkers of our time, this ground breaking survey offers an unprecedented insight into architecture's new place in a changing climate.

About the Author

Born and raised in Oakland, California, Andrew Michler, LEED AP BD+C, CPHC, found his way to a pine forest in the Colorado Rockies where he has lived off-grid since 1995. Merging work in design/construction, visual arts, and sustainable building research he has written extensively about sustainability in architecture. His research has also led him to investigate Passive House. He designed and built the first international certified Passive House in Colorado which is free of foam and other toxic materials. Michler consults, through his firm Baosol llc, on low impact and adaptive building design and materials. His wide-ranging exploration of design and environmental impact has led him all over the world. Exploring the edges of contemporary environmental architecture has helped Michler come to terms with the complex relationship between our built and natural environments.

Users Review

From reader reviews:

Michael Stein:

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite reserve and reading a guide. Beside you can solve your problem; you can add your knowledge by the guide entitled [ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes. Try to stumble through book [ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes as your close friend. It means that it can to get your friend when you experience alone and beside that of course make you smarter than ever before. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know almost everything by the book. So , we need to make new experience in addition to knowledge with this book.

Emma Patterson:

Nowadays reading books be a little more than want or need but also work as a life style. This reading practice give you lot of advantages. Associate programs you got of course the knowledge your information inside the book that improve your knowledge and information. The data you get based on what kind of reserve you read, if you want get more knowledge just go with schooling books but if you want feel happy read one using theme for entertaining for example comic or novel. The particular [ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes is kind of book which is giving the reader capricious experience.

Beulah Chavez:

Hey guys, do you want to find a new book to study? Maybe the book with the name [ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes suitable to you? The book was written by a famous writer in this era. Often the book is titled [ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes. It is one of several books that everyone reads now. That book was inspired by many men and women in the world. When you read this e-book, you will enter new dimensions that you have never known before. The author explained their plan in a simple way, and so all people can easily comprehend the core of this guide. This book will give you a large amount of information about the world now. In order to see the representation of the world with this book.

Matthew Russell:

Some people said that they feel fed up when they read an e-book. They directly felt that when they get a half portion of the book. You can choose the actual book [ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes to make your own personal reading interesting. Your own personal reading skill is developing when you like reading. Try to choose a straightforward book to make you enjoy. You just read it and mingle the sensation about the book and examine especially. It is initially your opinion to like to open a book and go through it. Besides that, the publication [ours] Hyperlocalization of Architecture: Contemporary Sustainable Archetypes can be your friend when you're really alone and confused with the information you're doing at the time.
