**Solved Problems in Quantum and Statistical Mechanics (UNITEXT)** By Michele Cini, Francesco Fucito, Mauro Sbragaglia

This textbook is the result of many years of teaching quantum and statistical mechanics, drawing on exercises and exam papers used on courses taught by the authors. The subjects of the exercises have been carefully selected to cover all the material which is most needed by students.

Each exercise is carefully solved in full details, explaining the theory behind the solution with particular care for those issues that students often find difficult, or which are often neglected in other books on the subject. The exercises in this book never require extensive calculations but tend to be somewhat unusual and force the solver to think about the problem starting from first principles, rather than by analogy with some previously solved exercise.

## **Editorial Review**

From the Back Cover

This work arises from our teaching this subject during many years. The vast majority of these exercises are the exams we gave to our students in this period. We carefully selected the subjects of the exercises to cover all the material which is most needed and which is treated in the most well known texts on these subjects. Each exercise is carefully solved in full details, explaining the theory behind the solution with particular care for those issues that, from our experience, are found most difficult from the average student. Indeed, several exercises are designed to throw light on aspects of the theory that, for one reason or another, are usually neglected with the result to make the students feel uneasy about them. In fact most students get acquainted just with the more common manipulations, which are illustrated by many examples in textbooks. Our exercises never require extensive calculations but tend to be somewhat unusual and force the solver to think about the problem starting from the principles, rather than by analogy with some previously solved exercise.

About the Author

Michele Cini is full professor of solid state theory at the Department of Physics, University of Rome Tor Vergata, Italy.

Francesco Fucito is INFN Research Director at the University of Rome Tor Vergata, Italy.

Mauro Sbragaglia is Associate Professor in Theoretical Physics, Mathematical Models and Methods in the Department of Physics at the University of Rome Tor Vergata, Italy.

## **Users Review**

**From reader reviews:**

**Harriet White:**

What do you think about book? It is just for students because they are still students or that for all people in the world, the actual best subject for that? Only you can be answered for that concern above. Every person has different personality and hobby for each other. Don't to be pressured someone or something that they don't need do that. You must know how great as well as important the book Solved Problems in Quantum and Statistical Mechanics (UNITEXT). All type of book are you able to see on many options. You can look for the internet methods or other social media.

**Jonathan Woods:**

Now a day individuals who Living in the era where everything reachable by interact with the internet and the resources included can be true or not involve people to be aware of each facts they get. How people have to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Reading

through a book can help persons out of this uncertainty Information mainly this Solved Problems in Quantum and Statistical Mechanics (UNITEXT) book because this book offers you rich facts and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you probably know this.

**Lorene Lord:**

You could spend your free time to read this book this publication. This Solved Problems in Quantum and Statistical Mechanics (UNITEXT) is simple to develop you can read it in the area, in the beach, train and also soon. If you did not possess much space to bring often the printed book, you can buy the actual e-book. It is make you much easier to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

**Florinda Redfern:**

You can obtain this Solved Problems in Quantum and Statistical Mechanics (UNITEXT) by browse the bookstore or Mall. Simply viewing or reviewing it might to be your solve issue if you get difficulties for the knowledge. Kinds of this reserve are various. Not only by written or printed but can you enjoy this book by simply e-book. In the modern era similar to now, you just looking because of your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose correct ways for you.
