Aircraft Structures for Engineering Students, Fifth Edition (Elsevier Aerospace Engineering) By T.H.G. Megson

Aircraft Structures for Engineering Students, Fifth Edition, is the leading self-contained aircraft structures course text. It covers all fundamental subjects, including elasticity, structural analysis, airworthiness, and aeroelasticity.

The author has revised and updated the text throughout and added new examples and exercises using Matlab. Additional worked examples make the text even more accessible by showing the application of concepts to airframe structures.

The text is designed for undergraduate and postgraduate students of aerospace and aeronautical engineering. It is also suitable for professional development and training courses.

- New worked examples throughout the text aid understanding and relate concepts to real world applications
- Matlab examples and exercises added throughout to support use of computational tools in analysis and design
- An extensive aircraft design project case study shows the application of the major techniques in the book

Editorial Review

Review

"This is an excellent book and should find a place on the shelf of any student or practising engineer involved in aircraft structural analysis. I can recommend it to the aeronautical community without reservation" --The Aeronautical Journal, October 2001

"As an introduction to the problems encountered in the structural design of modern aircraft, Megson's book can be recommended to both students and those engaged in structural analysis aerospace design offices."
--**Aerospace**

About the Author

T.H.G. Megson is a professor emeritus with the Department of Civil Engineering at Leeds University (UK). For Elsevier he has written the market leading Butterworth Heinemann textbooks Aircraft Structures for Engineering Students and Introduction to Aircraft Structural Analysis (a briefer derivative of the aircraft structures book), as well as the text/ref hybrid Structural and Stress Analysis.

Users Review

From reader reviews:

Michael Riddle:

The book Aircraft Structures for Engineering Students, Fifth Edition (Elsevier Aerospace Engineering) can give more knowledge and information about everything you want. Exactly why must we leave the best thing like a book Aircraft Structures for Engineering Students, Fifth Edition (Elsevier Aerospace Engineering)? A number of you have a different opinion about guide. But one aim in which book can give many info for us. It is absolutely correct. Right now, try to closer with your book. Knowledge or details that you take for that, it is possible to give for each other; you could share all of these. Book Aircraft Structures for Engineering Students, Fifth Edition (Elsevier Aerospace Engineering) has simple shape however, you know: it has great and massive function for you. You can look the enormous world by open and read a publication. So it is very wonderful.

Paul Otoole:

Nowadays reading books become more than want or need but also work as a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The information you get based on what kind of reserve you read, if you want have more knowledge just go with education and learning books but if you want sense happy read one using theme for entertaining for example comic or novel. Often the Aircraft Structures for Engineering Students, Fifth Edition (Elsevier Aerospace Engineering) is kind of guide which is giving the reader erratic experience.

Alma Rasmussen:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their leisure time with their family, or their very own friends. Usually they undertaking activity like watching television, likely to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your own free time/ holiday? May be reading a book may be option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to attempt look for book, may be the reserve untitled Aircraft Structures for Engineering Students, Fifth Edition (Elsevier Aerospace Engineering) can be fine book to read. May be it could be best activity to you.

Alexander Goodman:

The book Aircraft Structures for Engineering Students, Fifth Edition (Elsevier Aerospace Engineering) has a lot info on it. So when you make sure to read this book you can get a lot of help. The book was compiled by the very famous author. Tom makes some research before write this book. This book very easy to read you will get the point easily after perusing this book.
