Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes (Routledge Studies in Bioenergy) From Routledge

Interest in anaerobic digestion (AD), the process of energy production through the production of biogas, has increased rapidly in recent years. Agricultural and other organic waste are important substrates that can be treated by AD.

This book is one of the first to provide a broad introduction to anaerobic digestion and its potential to turn agricultural crops or crop residues, animal and other organic waste, into biomethane. The substrates used can include any non-woody materials, including grass and maize silage, seaweeds, municipal and industrial wastes. These are all systematically reviewed in terms of their suitability from a biological, technical and economic perspective. In the past the technical competence and high capital investment required for industrial-scale anaerobic digesters has limited their uptake, but the authors show that recent advances have made smaller-scale systems more viable through a greater understanding of optimising bacterial metabolism and productivity. Broader issues such as life cycle assessment and energy policies to promote AD are also discussed.

Editorial Review

Review

"The rapid uptake of anaerobic digestion throughout Europe to achieve energy and nutrient recovery from organic wastes, has led to a commensurate increase in the technical literature around waste digestion. This timely publication provides an excellent synthesis of our present understanding whilst highlighting the outstanding problems. It provides both researchers and practitioners a easy route into this challenging subject area." – *Nigel Horan, University of Leeds, and Chair of Aqua Enviro Ltd, UK*

About the Author

Nicholas E. Korres is a researcher at the University of Arkansas, USA.

Padraig O'Kiely works at Teagasc, the Irish Agricultural Authority, Ireland.

John A.H. Benzie is a Professor in the Environmental Research Institute at University College Cork, Ireland.

Jonathan S. West is a senior scientist at Rothamsted Research, Harpenden, UK.

Users Review

From reader reviews:

Curtis Monahan:

Do you certainly one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes (Routledge Studies in Bioenergy) book is readable by you who hate those perfect word style. You will find the facts here are arrange for enjoyable examining experience without leaving possibly decrease the knowledge that want to supply to you. The writer of Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes (Routledge Studies in Bioenergy) content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the content material but it just different as it. So , do you continue to thinking Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes (Routledge Studies in Bioenergy) is not loveable to be your top list reading book?

Roger Lee:

Are you kind of hectic person, only have 10 as well as 15 minute in your morning to upgrading your mind skill or thinking skill even analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short space of time to read it because this all time you only find publication that need more time to be read. Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and

Organic Wastes (Routledge Studies in Bioenergy) can be your answer mainly because it can be read by anyone who have those short extra time problems.

Ann Clark:

In this age globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Often the book that recommended for you is Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes (Routledge Studies in Bioenergy) this reserve consist a lot of the information with the condition of this world now. This particular book was represented how do the world has grown up. The words styles that writer value to explain it is easy to understand. Typically the writer made some exploration when he makes this book. That is why this book acceptable all of you.

Jessica Duncan:

Is it you actually who having spare time subsequently spend it whole day by simply watching television programs or just laying on the bed? Do you need something totally new? This Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes (Routledge Studies in Bioenergy) can be the solution, oh how comes? A fresh book you know. You are thus out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these publications have than the others?
