Cell Biology By A. Channarayappa

Cell Biology covers one of the most fundamental and elaborately studied areas of biology: the cell. The cell is the basic unit of life and has all the structural and functional properties required for life. The book has been divided into 20 chapters beginning with the origin of biological systems and ending with tools for the study of cells. Every effort has been made to include the most recent information. Each chapter is provided with an adequate number of illustrations. This book can serve as a basic textbook for students of molecular biology, genetics, biochemistry, agriculture and biotechnology, or as a reference book for those interested in learning the fundamentals of cell biology, in particular, the origin, organization and functions of subcellular components and cell types.

Editorial Review

About the Author

Channarayappa, received his B.Sc. (Ag.), M.Sc. (Ag.), and Ph.D. degrees from the University of Agricultural Sciences, Bangalore. He then went on to earn a second Ph.D., in Genetics and Developmental Biology from West Virginia University, USA, in 1990. He worked as a Postdoctoral Fellow and Postdoctoral Research Associate at the University of Texas MD Anderson Cancer Center, Houston. He was the recipient of the Jawaharlal Nehru National Award for Outstanding Postgraduate Agricultural Research (1993) for significant research contribution in genetics and plant breeding, awarded by the Indian Council of Agricultural Research, New Delhi. He has been teaching both undergraduate and postgraduate students of molecular biology and biotechnology courses for more than 20 years. He is the author of many scientific papers resulting from research conducted in plant sciences, mutation research, and cancer biology. He has already published a book with us: *Molecular Biotechnology: Principles and Practices*.

Users Review

From reader reviews:

Bobbie Flores:

Within other case, little individuals like to read book Cell Biology. You can choose the best book if you love reading a book. Providing we know about how is important some sort of book Cell Biology. You can add expertise and of course you can around the world with a book. Absolutely right, mainly because from book you can recognize everything! From your country until finally foreign or abroad you may be known. About simple thing until wonderful thing you are able to know that. In this era, you can open a book or perhaps searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's learn.

Christina Pena:

Do you have something that you enjoy such as book? The guide lovers usually prefer to opt for book like comic, brief story and the biggest an example may be novel. Now, why not attempting Cell Biology that give your entertainment preference will be satisfied through reading this book. Reading practice all over the world can be said as the opportunity for people to know world a great deal better then how they react when it comes to the world. It can't be mentioned constantly that reading addiction only for the geeky person but for all of you who wants to become success person. So , for all you who want to start studying as your good habit, you are able to pick Cell Biology become your own personal starter.

Barbara Jackson:

That reserve can make you to feel relax. This kind of book Cell Biology was colourful and of course has pictures around. As we know that book Cell Biology has many kinds or category. Start from kids until teens. For example Naruto or Investigation company Conan you can read and think that you are the character on there. Therefore not at all of book are usually make you bored, any it makes you feel happy, fun and chill

out. Try to choose the best book to suit your needs and try to like reading in which.

Diana Gum:

Reserve is one of source of knowledge. We can add our understanding from it. Not only for students but in addition native or citizen want book to know the upgrade information of year in order to year. As we know those books have many advantages. Beside all of us add our knowledge, can also bring us to around the world. From the book Cell Biology we can have more advantage. Don't you to be creative people? Being creative person must prefer to read a book. Just choose the best book that appropriate with your aim. Don't always be doubt to change your life with that book Cell Biology. You can more attractive than now.
