Face Recognition Across the Imaging Spectrum From Springer

This authoritative text/reference presents a comprehensive review of algorithms and techniques for face recognition (FR), with an emphasis on systems that can be reliably used in operational environments. Insights are provided by an international team of pre-eminent experts into the processing of multispectral and hyperspectral face images captured under uncontrolled environments. These discussions cover a variety of imaging sensors ranging from state-of-the-art visible and infrared imaging sensors, to RGB-D and mobile phone image sensors. A range of different biometric modalities are also examined, including face, periocular and iris. This timely volume is a mine of useful information for researchers, practitioners and students involved in image processing, computer vision, biometrics and security.

Editorial Review

From the Back Cover

This authoritative text/reference presents a comprehensive review of algorithms and techniques for face recognition (FR), with an emphasis on systems that can be reliably used in operational environments. Insights are provided by an international team of pre-eminent experts into the processing of multispectral and hyperspectral face images captured under uncontrolled environments. These discussions cover a variety of imaging sensors ranging from state-of-the-art visible and infrared imaging sensors, to RGB-D and mobile phone image sensors. A range of different biometric modalities are also examined, including face, periocular and iris.

Topics and features:

- Presents a detailed introduction to the spectral imaging of human skin, and describes the data collection of multispectral and hyperspectral face images
- Covers a range of face-based identification technologies addressing challenges in the processing of face images in visible and infrared spectral bands
- Provides an overview of spoofing attacks and counter-measures for FR systems, and analyzes the effects of digital image alterations on FR algorithms
- Investigates the processing of degraded face photographs from ID documents, and examines mobile FR in still images and video sequences
- Proposes a state-of-the-art RGB-D FR algorithm, and suggests algorithms for 3D-based FR as well as techniques blending 2D and 3D data
- Discusses score normalization methods, and explores the use of patterns in the sclera in order to improve the robustness of iris recognition systems

This timely volume is a mine of useful information for researchers, practitioners and students involved in image processing, computer vision, biometrics and security.

Dr. Thirimachos Bourlai is an Assistant Professor in the Lane Department of Computer Science and Electrical Engineering at West Virginia University, Morgantown, WV, USA.

Users Review

From reader reviews:

Frances Lawler:

The book Face Recognition Across the Imaging Spectrum can give more knowledge and information about everything you want. Why must we leave a good thing like a book Face Recognition Across the Imaging Spectrum? A few of you have a different opinion about book. But one aim that will book can give many information for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or details that you take for that, you could give for each other; you may share all of these. Book Face Recognition Across the Imaging Spectrum has simple shape however, you know: it has great and big

function for you. You can appearance the enormous world by open up and read a e-book. So it is very wonderful.

Bobby Griffin:

In this 21st century, people become competitive in every single way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated it for a while is reading. Sure, by reading a book your ability to survive raise then having chance to remain than other is high. For yourself who want to start reading any book, we give you this Face Recognition Across the Imaging Spectrum book as beginning and daily reading book. Why, because this book is usually more than just a book.

Jordan Moore:

Does one one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you find out the inside because don't judge book by its deal with may doesn't work here is difficult job because you are scared that the inside maybe not while fantastic as in the outside look likes. Maybe you answer could be Face Recognition Across the Imaging Spectrum why because the amazing cover that make you consider about the content will not disappoint you. The inside or content will be fantastic as the outside or even cover. Your reading 6th sense will directly assist you to pick up this book.

Marian Carson:

The book untitled Face Recognition Across the Imaging Spectrum contain a lot of information on the idea. The writer explains the woman idea with easy approach. The language is very straightforward all the people, so do not worry, you can easy to read it. The book was published by famous author. The author brings you in the new age of literary works. You can read this book because you can please read on your smart phone, or model, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and also order it. Have a nice examine.
