General, Organic, and Biological Chemistry (2nd Edition) By Laura D. Frost, S. Todd Deal

Frost and Deal's *General, Organic, and Biological Chemistry* gives students a focused introduction to the fundamental and relevant connections between chemistry and life. Emphasizing the development of problem-solving skills with distinct Inquiry Questions and Activities, this text empowers students to solve problems in different and applied contexts relating to health and biochemistry. Integrated coverage of biochemical applications throughout keeps students interested in the material and allow for a more efficient progression through the topics.

Concise, practical, and integrated, Frost's streamlined approach offers students a clear path through the content. Applications throughout the narrative, the visual program, and problem-solving support in each chapter improve their retention of the concepts and skills as they master them. General, organic, and biological chemistry topics are integrated throughout each chapter to create a seamless framework that immediately relates chemistry to students' future allied health careers and their everyday lives.

Note: This is the standalone book, if you want the book/access card order the ISBN below:

0321802632 / 9780321802637 General, Organic, and Biological Chemistry Plus MasteringChemistry with eText -- Access Card Package

Package consists of:

0321803035 / 9780321803030 General, Organic, and Biological Chemistry

0321833945 / 9780321833945 MasteringChemistry with Pearson eText -- ValuePack Access Card -- for General, Organic, and Biological Chemistry

Editorial Review

About the Author

Laura D. Frost is a Professor of Chemistry at Florida Gulf Coast University. She received her bachelor's degree in chemistry from Kutztown University and a Ph.D. in chemistry with a biophysical focus from the University of Pennsylvania.

Professor Frost is actively engaged in the teaching and learning of chemistry and uses a guided inquiry approach in her classes. Dr. Frost is a member of the American Chemical Society and its Chemical Education division and the Biophysical Society. In 2007, she was honored with the Regent's Award for the Scholarship of Teaching and Learning by the University System of Georgia and was inducted into the Regent's Hall of Fame for Teaching Excellence. She is an advocate for increased student learning in science, technology, engineering, and mathematics (STEM) disciplines using guided inquiry and has spoken at numerous conferences and workshops on this topic.

Todd S. Deal received his B.S. degree in chemistry in 1986 from Georgia Southern College (now University) in Statesboro, Georgia, and his Ph.D. in chemistry in 1990 from The Ohio State University. He joined the faculty of his undergraduate alma mater in 1992, where he currently serves as Director of the Office of Student Leadership and Civic Engagement.

Professor Deal has taught chemistry to allied health and preprofessional students for 20 years. In 1994, he was selected Professor of the Year by the students at Georgia Southern University. Professor Deal is also the recipient of the Allen E. Paulson College of Science and Technology's Award for Excellence in Teaching (2003), the Georgia Southern University Award for Excellence in Contributions to Instruction (2003), and the Allen E. Paulson College of Science and Technology's Award for Excellence in Service (2006).

Karen Timberlake is Professor Emerita of chemistry at Los Angeles Valley College, where she taught chemistry for allied health and preparatory chemistry for 36 years. Professor Timberlake has been writing chemistry textbooks for 33 years. She is known for her strategic use of pedagogical tools that promote student success in chemistry and the application of chemistry to real-life situations. More than one million students have learned chemistry using texts, laboratory manuals, and study guides written by Karen Timberlake.

Users Review

From reader reviews:

Barry Phelan:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each book has different aim or goal; it means that book has different type. Some people feel enjoy to spend their time and energy to read a book. They are really reading whatever they acquire because their hobby will be reading a book. Consider the person who don't like reading through a book? Sometime, individual feel need book once they found difficult problem or exercise. Well, probably you will require this General, Organic, and Biological Chemistry (2nd Edition).

Jennifer Mendoza:

This General, Organic, and Biological Chemistry (2nd Edition) usually are reliable for you who want to become a successful person, why. The reason why of this General, Organic, and Biological Chemistry (2nd Edition) can be one of many great books you must have is usually giving you more than just simple looking at food but feed an individual with information that probably will shock your before knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed ones. Beside that this General, Organic, and Biological Chemistry (2nd Edition) giving you an enormous of experience for instance rich vocabulary, giving you test of critical thinking that could it useful in your day activity. So , let's have it and luxuriate in reading.

William Rocha:

The book untitled General, Organic, and Biological Chemistry (2nd Edition) contain a lot of information on this. The writer explains the girl idea with easy approach. The language is very straightforward all the people, so do not really worry, you can easy to read the idea. The book was written by famous author. The author will take you in the new era of literary works. You can easily read this book because you can keep reading your smart phone, or gadget, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can open up their official web-site and also order it. Have a nice read.

Arlene Farrar:

You are able to spend your free time to see this book this e-book. This General, Organic, and Biological Chemistry (2nd Edition) is simple to deliver you can read it in the park your car, in the beach, train and also soon. If you did not include much space to bring the particular printed book, you can buy the e-book. It is make you quicker to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.
