Generations: The History of America's Future, 1584 to 2069 By Neil Howe, William Strauss

Hailed by national leaders as politically diverse as former Vice President Al Gore and former House Speaker Newt Gingrich, *Generations* has been heralded by reviewers as a brilliant, if somewhat unsettling, reassessment of where America is heading.

William Strauss and Neil Howe posit the history of America as a succession of generational biographies, beginning in 1584 and encompassing every-one through the children of today. Their bold theory is that each generation belongs to one of four types, and that these types repeat sequentially in a fixed pattern. The vision of *Generations* allows us to plot a recurring cycle in American history -- a cycle of spiritual awakenings and secular crises -- from the founding colonists through the present day and well into this millenium.

Generations is at once a refreshing historical narrative and a thrilling intuitive leap that reorders not only our history books but also our expectations for the twenty-first century.

Editorial Review

From Publishers Weekly

Ex-Capitol Hill aides Strauss and Howe analyze American history according to a convoluted theory of generational cycles, concocting a chronicle that often seems as woolly as a newspaper horoscope.
