Reconstructing Quaternary Environments By J. John Lowe, Michael J.C Walker

This third edition of *Reconstructing Quaternary Environments* has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and geochemical data, and includes new data from terrestrial, marine and ice-core records. Dating methods are described and evaluated, while the principles and practices of Quaternary stratigraphy are also discussed. The volume concludes with a new chapter which considers some of the key questions about the nature, causes and consequences of global climatic and environmental change over a range of temporal scales. This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are providing new insights into the operation of the global earth-ocean-atmosphere system, and are now central to many areas of contemporary Quaternary research.

This comprehensive and dynamic textbook is richly illustrated throughout with full-colour figures and photographs. The book will be of interest to undergraduates, postgraduates and professionals in Earth Science, Environmental Science, Physical Geography, Geology, Botany, Zoology, Ecology, Archaeology and Anthropology

Editorial Review

Review

"This is a splendid compendium of what we know and understand about Quaternary environments, and how we study them. Lowe and Walker are to be congratulated on this fully updated version of their popular textbook. *Reconstructing Quaternary Environments* continues to be a must for Quaternary sciences courses at all university levels and an indispensable reference source for professional geoscientists. This new edition is beautifully illustrated and provides diverse examples from around the world; it is a real *tour de force* of Quaternary studies."

Professor Lewis Owen, Department of Geology, University of Cincinnati, USA

"The literature in Quaternary environmental and climatic change has increased exponentially during the last decades and now covers a wide range of archives, proxies and modelling studies. In this revised and updated 3rd edition, Lowe and Walker have successfully integrated the wealth of new data from around the world. The up-to-date information and references, the elegant language, the explanatory notes after each chapter and full-colour illustrations and photos all serve to make this wonderful textbook a treasure trove for students, researchers and anyone else interested in finding out more about the exciting subject of Quaternary climate and environmental change."

Professor Barbara Wohlfarth, Department of Geological Sciences, Stockholm University, Sweden

"The third edition of *Reconstructing Quaternary Environments* by John Lowe and Mike Walker continues the impressive standards set by its two predecessor volumes. Well written, extensively referenced and with numerous clear diagrams and colour figures, it sets the standard for textbooks on Quaternary science and the techniques to reconstruct environmental change. It should be essential reading for students and will be an invaluable reference for all those with an interest in the Quaternary."

Professor Colm O'Cofaigh, Department of Geography, Durham University, UK

"A good reference for courses (if complemented by a work with better focus on the human record) and a general introduction to this topic. Summing Up: Recommended. Upper-division undergraduates, graduate students, researchers/faculty."

CHOICE, E. Delson, CUNY Herbert H. Lehman College

About the Author

John Lowe is former Gordon Manley Professor of Geography and Quaternary Science, and now Emeritus Professor of Quaternary Science, Royal Holloway University of London.

Mike Walker is Emeritus Professor of Quaternary Science, School of Archaeology, History and Anthropology at Trinity Saint David, University of Wales, Lampeter, and Honorary Professor, Aberystwyth University.

Users Review

From reader reviews:

Gina Melton:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each guide has different aim or perhaps goal; it means that reserve has different type. Some people truly feel enjoy to spend their the perfect time to read a book. They may be reading whatever they get because their hobby will be reading a book. Think about the person who don't like looking at a book? Sometime, person feel need book if they found difficult problem as well as exercise. Well, probably you will need this Reconstructing Quaternary Environments.

Lynette Petree:

Do you certainly one of people who can't read pleasant if the sentence chained in the straightway, hold on guys this aren't like that. This Reconstructing Quaternary Environments book is readable by simply you who hate the perfect word style. You will find the facts here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to provide to you. The writer associated with Reconstructing Quaternary Environments content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the content material but it just different as it. So , do you nonetheless thinking Reconstructing Quaternary Environments is not loveable to be your top record reading book?

Lorraine Cox:

Reading can called head hangout, why? Because while you are reading a book particularly book entitled Reconstructing Quaternary Environments your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely will become your mind friends. Imaging just about every word written in a guide then become one type conclusion and explanation that maybe you never get ahead of. The Reconstructing Quaternary Environments giving you another experience more than blown away your thoughts but also giving you useful details for your better life with this era. So now let us teach you the relaxing pattern this is your body and mind are going to be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

Dianne Janelle:

Many people spending their period by playing outside along with friends, fun activity having family or just watching TV 24 hours a day. You can have new activity to pay your whole day by looking at a book. Ugh, you think reading a book can definitely hard because you have to use the book everywhere? It ok you can have the e-book, having everywhere you want in your Cell phone. Like Reconstructing Quaternary

Environments which is having the e-book version. So , try out this book? Let's notice.
