Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects By Stuart L. Shapiro, Saul A. Teukolsky

This self-contained textbook brings together many different branches of physics--e.g. nuclear physics, solid state physics, particle physics, hydrodynamics, relativity--to analyze compact objects. The latest astronomical data is assessed. Over 250 exercises.

Editorial Review

From the Publisher

This self-contained textbook brings together many different branches of physics--e.g. nuclear physics, solid state physics, particle physics, hydrodynamics, relativity--to analyze compact objects. The latest astronomical data is assessed. Over 250 exercises.

From the Back Cover

Black holes, White Dwarfs, and Neutron Stars The physics of Compact Objects Compact objects-black holes, white dwarfs, and neutron stars-are fundamental constituents of the physical universe. They are born when normal stars die. This book is a product of the recent explosion of scientific activity centering on these objects. This self-contained work is a rigorous, yet understandable, references on the latest theoretical and observational developments. It is at once an outstanding text for graduate and advanced undergraduate students in physics, and a practical self-study guide for scientists in other disciplines and scientifically-oriented laypersons. No prior knowledge of astrophysics or relativity theory is required. Compact objects provide unique cosmic laboratories for testing physics and astrophysics under extreme conditions. They interact via all four of the fundamental forces of nature: electromagnetism, strong and weak nuclear forces, and gravitation. As a result, the book brings together topics from such diverse areas as solid state physics, nuclear and particle physics, relativity and hydrodynamics. In the text, the authors first analyze the physical properties of compact objects in their simplest states. Next, they investigate the effects of rotation, magnetic fields, X-ray and neutrino emission, the generation of gravitational waves, and so on. The theory is assessed in light of the most recent observational data. Numerous practical features to make teaching and learning easier include:

- * a road map for using the book effectively
- * over 250 exercises, including several small-scale computer problems
- * extensive references
- * boxes summarizing major points
- * carefully constructed and attractive tables and illustrations.

Dr. Stuart L. Shapiro and Dr. Saul A. Teukolsky are both Professors of Physics and Astronomy at Cornell University.

Users Review

From reader reviews:

Natalia Burton:

Here thing why that Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects are different and reliable to be yours. First of all studying a book is good however it depends in the content of the usb ports which is the content is as delicious as food or not. Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects giving you information deeper since different ways, you can find any publication out there but there is no e-book that similar with Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects. It gives you thrill examining journey, its open up your current eyes about the thing in which happened in the world which is maybe can be happened around you. You can easily bring everywhere like in park your car, café, or even in your method home by train. When you are having difficulties in bringing the published book maybe the form of Black Holes, White Dwarfs and Neutron Stars:

The Physics of Compact Objects in e-book can be your choice.

Steve Henry:

Hey guys, do you would like to finds a new book to study? May be the book with the title Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects suitable to you? Typically the book was written by well-known writer in this era. Typically the book untitled Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects is one of several books that everyone read now. That book was inspired many men and women in the world. When you read this publication you will enter the new way of measuring that you ever know previous to. The author explained their strategy in the simple way, so all of people can easily to know the core of this book. This book will give you a lots of information about this world now. So you can see the represented of the world in this book.

Caitlin Cruz:

Spent a free time for you to be fun activity to try and do! A lot of people spent their leisure time with their family, or all their friends. Usually they undertaking activity like watching television, likely to beach, or picnic inside park. They actually doing same every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? Can be reading a book is usually option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the reserve untitled Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects can be excellent book to read. May be it can be best activity to you.

Betty Bass:

As we know that book is vital thing to add our know-how for everything. By a reserve we can know everything we would like. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This reserve Black Holes, White Dwarfs and Neutron Stars: The Physics of Compact Objects was filled about science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has different feel when they reading some sort of book. If you know how big advantage of a book, you can experience enjoy to read a e-book. In the modern era like currently, many ways to get book which you wanted.
