Engineering Fundamentals and Problem Solving (General Engineering) By Arvid Eide, Roland Jenison, Larry Northup, Steven Mickelson

Engineering Fundamentals & Problem Solving is written to motivate engineering students during their first year.

A complete introduction to the engineering field, this text will help students **develop the skills to solving open-ended problems in SI and customary units while presenting solutions in a logical manner.** Eide introduces students to subject areas that are common to engineering disciplines that require the application of fundamental engineering concepts.

Engineering Fundamentals & Problem Solving remains the most comprehensive text for an introductory engineering course. The book provides students a realistic opportunity to learn to apply engineering principles to the solution of engineering problems, and the author's approach keeps students on task toward an engineering career by showing how the materials applies to the student's school, life, and career.

While not every course will cover all the topics in this text, McGraw-Hill is proud to offer **Create**, which will allow you to select the material you need from this text and many others in our B.E.S.T. series for freshman engineering so you can create materials exactly suited to your course. For more information, please go to the Create website or contact your sales representative.

Editorial Review

Users Review

From reader reviews:

Steven Clayton:

The book Engineering Fundamentals and Problem Solving (General Engineering) can give more knowledge and information about everything you want. Why must we leave the great thing like a book Engineering Fundamentals and Problem Solving (General Engineering)? Some of you have a different opinion about publication. But one aim that will book can give many information for us. It is absolutely correct. Right now, try to closer using your book. Knowledge or details that you take for that, you may give for each other; you could share all of these. Book Engineering Fundamentals and Problem Solving (General Engineering) has simple shape but you know: it has great and massive function for you. You can seem the enormous world by start and read a reserve. So it is very wonderful.

Maurice Miller:

Book is to be different for each and every grade. Book for children till adult are different content. As you may know that book is very important for us. The book Engineering Fundamentals and Problem Solving (General Engineering) was making you to know about other understanding and of course you can take more information. It doesn't matter what advantages for you. The guide Engineering Fundamentals and Problem Solving (General Engineering) is not only giving you a lot more new information but also to get your friend when you really feel bored. You can spend your own spend time to read your guide. Try to make relationship while using book Engineering Fundamentals and Problem Solving (General Engineering). You never sense lose out for everything when you read some books.

Kenton Marshall:

Reading a e-book can be one of a lot of activity that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new details. When you read a publication you will get new information mainly because book is one of many ways to share the information or maybe their idea. Second, looking at a book will make you actually more imaginative. When you reading through a book especially fiction book the author will bring you to definitely imagine the story how the personas do it anything. Third, you may share your knowledge to other people. When you read this Engineering Fundamentals and Problem Solving (General Engineering), it is possible to tells your family, friends in addition to soon about yours guide. Your knowledge can inspire others, make them reading a guide.

Barbara Corbin:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is published or printed or descriptive from each source this filled update of news. In this particular modern era like currently, many ways to get information are available for an individual. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just in search of the Engineering Fundamentals and Problem Solving (General Engineering) when you required it?
