Start Your Engines: Developing Driving and Racing Games By Jim Parker

Start Your Engines: Developing Driving and Racing Games is a unique book that will teach readers everything they need to set up different types of road conditions, create opponents, set up road hazards, generate weather conditions, manage collisions, and much more. Not only will readers end up with the knowledge and tools they need to create driving and racing games, they get a full-featured, playable racing game that they can expand and customize with the skills learned in the book. The book shows readers how to develop live-action, interactive racing games with a unique three-tiered approach. Readers will start off by learning how to build a model for a racing game and then apply the physics to create a simple 2D (flat) game while learning how to create a variety of vehicles, race opponents, and terrain. In tier two, readers learn how to go from 2D to 3D with the same game concepts illustrating how to take the same basic idea for a game (and gameplay) and use modeling tips and tricks to begin customizing features. In the final tier, the author takes the concepts of 3D driving games to Mars with data modeled from real Mars terrain. Readers will create a dune buggy race on the planet of Mars and learn to create cool racing action at a bizarre and treacherous location.

About the Author

Dr. Jim Parker (Alberta, Canada), an expert on driving and racing games, has been an educator, programmer, and game designer for many years. In 2000 he pioneered Canada's first curriculum to train and educate aspiring game developers at the University of Calgary, in conjunction with Radical Entertainment of Vancouver. His course in Computer Game Programming at the University of Calgary always contains a driving game as the project for the class. He is a firm believer in the democratization of game creation, and this book is but one step in that process – teaching others that they, too, can make a game that someone will want to play. Dr. Parker lives with his family on a farm near Cochrane, Alberta.
