## Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) By Li Deng, Dong Yu

Deep Learning: Methods and Applications provides an overview of general deep learning methodology and its applications to a variety of signal and information processing tasks. The application areas are chosen with the following three criteria in mind: (1) expertise or knowledge of the authors; (2) the application areas that have already been transformed by the successful use of deep learning technology, such as speech recognition and computer vision; and (3) the application areas that have the potential to be impacted significantly by deep learning and that have been benefitting from recent research efforts, including natural language and text processing, information retrieval, and multimodal information processing empowered by multi-task deep learning. Deep Learning: Methods and Applications is a timely and important book for researchers and students with an interest in deep learning methodology and its applications in signal and information processing. "This book provides an overview of a sweeping range of up-to-date deep learning methodologies and their application to a variety of signal and information processing tasks, including not only automatic speech recognition (ASR), but also computer vision, language modeling, text processing, multimodal learning, and information retrieval. This is the first and the most valuable book for "deep and wide learning" of deep learning, not to be missed by anyone who wants to know the breathtaking impact of deep learning on many facets of information processing, especially ASR, all of vital importance to our modern technological society." - Sadaoki Furui, President of Toyota Technological Institute at Chicago, and Professor at the Tokyo Institute of Technology.

### **Editorial Review**

### **Users Review**

#### **From reader reviews:**

#### **Jon Harrill:**

The guide untitled Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) is the reserve that recommended to you to learn. You can see the quality of the book content that will be shown to an individual. The language that writer use to explained their way of doing something is easily to understand. The author was did a lot of exploration when write the book, to ensure the information that they share for you is absolutely accurate. You also could get the e-book of Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) from the publisher to make you much more enjoy free time.

#### **Mary Stock:**

Often the book Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) has a lot associated with on it. So when you read this book you can get a lot of advantage. The book was published by the very famous author. Mcdougal makes some research prior to write this book. This particular book very easy to read you can obtain the point easily after reading this book.

#### **Joyce Pippin:**

This Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) is great reserve for you because the content which is full of information for you who else always deal with world and get to make decision every minute. This kind of book reveal it information accurately using great manage word or we can state no rambling sentences within it. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only gives you straight forward sentences but tough core information with beautiful delivering sentences. Having Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) in your hand like getting the world in your arm, info in it is not ridiculous one. We can say that no e-book that offer you world throughout ten or fifteen tiny right but this publication already do that. So , it is good reading book. Hey there Mr. and Mrs. active do you still doubt that will?

#### **Clara Radtke:**

What is your hobby? Have you heard that question when you got scholars? We believe that that issue was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you also know that little person similar to reading or as looking at become their hobby. You need to know that reading is very important as well as book as to be the factor. Book is important thing to include you knowledge, except

your own personal teacher or lecturer. You will find good news or update about something by book. Amount types of books that can you go onto be your object. One of them is this Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing).
