Fluid Power Pumps and Motors: Analysis, Design and Control (Mechanical Engineering) By Noah D. Manning

A COMPLETE GUIDE TO FLUID POWER PUMPS AND MOTORS

Written by an expert in the field of fluid power, this book provides proven methods for analyzing, designing, and controlling high-performance axial-piston swash-plate type machinery. *Fluid Power Pumps and Motors: Analysis, Design, and Control* offers a comprehensive mechanical analysis of hydrostatic machines and presents meticulous design guidelines for machine components. Detailed diagrams and useful formulas are included throughout. Using the results and techniques employed in this practical resource will reduce product delivery lead-time and costs to increase overall efficiency.

COVERAGE INCLUDES:

Fluid properties | Fluid mechanics | Mechanical analysis Piston pressure | Steady-state results | Machine efficiency Designing a cylinder block, valve plate, piston, slipper, swash plate, and shaft | Displacement controlled pumps Pressure controlled pumps

Editorial Review

About the Author

Noah Manning is the Glen A. Barton Professor for Fluid Power in the Mechanical and Aerospace Engineering Department at the University of Missouri–Columbia (UMC). Before joining the faculty at UMC, he worked for eight years in the off-highway mobile equipment industry. Dr. Manning holds ten U.S. patents for innovations in the field of fluid power. As a professor, he has received research funding from Caterpillar, Inc., Festo Corp., and the National Fluid Power Association, among others, as well as the U.S. Department of Education, the National Science Foundation, and various private donors. Dr. Manning currently serves as the Associate Dean for Research in the College of Engineering at the University of Missouri. He has done consulting work for several industrial firms, including Moog Inc., FMC Wyoming Corp., Dennison Hydraulics, and Parker Hannifin.

Users Review

From reader reviews:

Anthony Laflamme:

In this period of time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. Typically the book that recommended for your requirements is Fluid Power Pumps and Motors: Analysis, Design and Control (Mechanical Engineering) this guide consist a lot of the information on the condition of this world now. This specific book was represented how does the world has grown up. The words styles that writer make usage of to explain it is easy to understand. Often the writer made some analysis when he makes this book. That's why this book appropriate all of you.

Tiffany Reyes:

Don't be worry when you are afraid that this book will probably filled the space in your house, you can have it in e-book technique, more simple and reachable. This Fluid Power Pumps and Motors: Analysis, Design and Control (Mechanical Engineering) can give you a lot of close friends because by you considering this one book you have matter that they don't and make an individual more like an interesting person. This specific book can be one of a step for you to get success. This guide offer you information that might be your friend doesn't recognize, by knowing more than other make you to be great men and women. So , why hesitate? We should have Fluid Power Pumps and Motors: Analysis, Design and Control (Mechanical Engineering).

James Sanchez:

You can get this Fluid Power Pumps and Motors: Analysis, Design and Control (Mechanical Engineering) by go to the bookstore or Mall. Merely viewing or reviewing it may to be your solve trouble if you get difficulties for your knowledge. Kinds of this book are various. Not only by means of written or printed but additionally can you enjoy this book through e-book. In the modern era similar to now, you just looking by your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose appropriate ways for you.

Kurt Bohnert:

What is your hobby? Have you heard in which question when you got pupils? We believe that that query was given by teacher with their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person just like reading or as looking at become their hobby. You must know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your own teacher or lecturer. You see good news or update concerning something by book. Different categories of books that can you go onto be your object. One of them are these claims Fluid Power Pumps and Motors: Analysis, Design and Control (Mechanical Engineering).
