Editorial Review

Amazon.com Review

This fascinating book is a valuable guide for farmers and the general public concerned about the overuse of nonnatural medicine, herbicides, and insecticides in farm management and animal husbandry. The author, Juliette de Bairacli Levy, offers detailed directions for treating all farm animals with natural methods, while stating her evidence that "mechanized" farming methods have led to the demise of domesticated animals' overall health. She asserts that poor and inadequate natural habitat, unnatural feeding practices, and a reliance on medicine to fight individual symptoms of disease without addressing the whole animal have weakened farm animals' innate disease-fighting ability. Her argument for a return to reliance on the natural and away from the synthetic and artificial rearing and feeding methods of farm animals becomes more urgent and relevant given the outbreaks of "mad cow disease" and other ailments caused by these practices. This book, used in conjunction with proper consultation with a veterinarian, can help animal owners and farmers move back to natural and healthy farming practices. --*Julia King*
