A First Course in Topology: An Introduction to Mathematical Thinking (Dover Books on Mathematics) By Robert A Conover

Students must prove all of the theorems in this undergraduate-level text, which features extensive outlines to assist in study and comprehension. Thorough and well-written, the treatment provides sufficient material for a one-year undergraduate course. The logical presentation anticipates students' questions, and complete definitions and expositions of topics relate new concepts to previously discussed subjects.

Most of the material focuses on point-set topology with the exception of the last chapter. Topics include sets and functions, infinite sets and transfinite numbers, topological spaces and basic concepts, product spaces, connectivity, and compactness. Additional subjects include separation axioms, complete spaces, and homotopy and the fundamental group. Numerous hints and figures illuminate the text.

About the Author

Robert A. Conover received his MS in mathematics from Rutgers University and his PhD from the University of Rochester. He taught at Trinity College from 1966 to 1968 and at Loyola University from 1971 to 1973.

Users Review

From reader reviews:

Paul Douglas:

As people who live in the actual modest era should be upgrade about what going on or info even knowledge to make these keep up with the era that is always change and make progress. Some of you maybe will certainly update themselves by reading through books. It is a good choice for yourself but the problems coming to anyone is you don't know what one you should start with. This A First Course in Topology: An Introduction to Mathematical Thinking (Dover Books on Mathematics) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and want in this era.

Edgar Hightower:

Do you have something that you prefer such as book? The publication lovers usually prefer to opt for book like comic, limited story and the biggest an example may be novel. Now, why not hoping A First Course in Topology: An Introduction to Mathematical Thinking (Dover Books on Mathematics) that give your pleasure preference will be satisfied by means of reading this book. Reading habit all over the world can be said as the way for people to know world a great deal better then how they react in the direction of the world. It can't be stated constantly that reading routine only for the geeky man or woman but for all of you who wants to

always be success person. So , for all you who want to start examining as your good habit, you could pick A First Course in Topology: An Introduction to Mathematical Thinking (Dover Books on Mathematics) become your current starter.

Kimberly Foley:

This A First Course in Topology: An Introduction to Mathematical Thinking (Dover Books on Mathematics) is great book for you because the content and that is full of information for you who also always deal with world and possess to make decision every minute. That book reveal it information accurately using great manage word or we can point out no rambling sentences included. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but difficult core information with splendid delivering sentences. Having A First Course in Topology: An Introduction to Mathematical Thinking (Dover Books on Mathematics) in your hand like obtaining the world in your arm, facts in it is not ridiculous a single. We can say that no e-book that offer you world inside ten or fifteen small right but this reserve already do that. So , this is certainly good reading book. Hello Mr. and Mrs. stressful do you still doubt that will?

Paul Breen:

You can obtain this A First Course in Topology: An Introduction to Mathematical Thinking (Dover Books on Mathematics) by look at the bookstore or Mall. Merely viewing or reviewing it could to be your solve difficulty if you get difficulties for ones knowledge. Kinds of this e-book are various. Not only by written or printed and also can you enjoy this book by means of e-book. In the modern era including now, you just looking by your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose appropriate ways for you.
