# Designing Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More

By Matt Carter

Designing Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More By Matt Carter

Designing Science Presentations guides researchers and graduate students of virtually any discipline in the creation of compelling science communication. Most scientists never receive formal training in the creation, delivery, and evaluation of such material, yet it is essential for publishing in high-quality journals, soliciting funding, attracting lab personnel, and advancing a career.

This clear, readable volume fills that gap and provides visually intensive guidance at every step?from the construction of original figures to the presentation and delivery of those figures in papers, slideshows, posters, and websites. It provides pragmatic advice on the preparation and delivery of exceptional scientific presentations; demonstrates hundreds of visually striking presentation techniques, giving readers inspiration for creating their own; and is structured so that readers can easily find answers to particular questions.

- Clear heading for each section indicates its message, highlighted with graphic illustrations
- Two summary paragraphs that complement the visual images and clearly discuss the main point
- Numerous examples of high-quality figures, page layouts, slides, posters, and web pages to help stimulate readers' ideas for their own presentations
- Numerous "before and after" examples to illustrate the contrast between poor and outstanding presentations

Editorial Review

Review

"Each chapter begins with an introduction to the material and contains a succinctly done and well-illustrated main body, followed by a listing of dos and don'ts for the type of material covered. The text is recommended for the novice presenter as well as the seasoned instructor looking for ways to improve delivery and, perhaps, student (or cohort) evaluations."--IEEE Pulse, **July/August 2014**

"This volume guides researchers and graduate students in the creation of compelling science communication...This clear, readable volume...provides visually intensive guidance at every step-from the construction of original figures to the presentation and delivery of those figures in papers, slideshows, posters, and websites."--Anticancer Research 34, **2014**

About the Author
Matt Carter, PhD, is currently Assistant Professor of Biology at Williams College. His previous position was as a post-doctoral fellow in Richard Palmiter's lab at the University of Washington using optogenetic techniques to study neural circuitry. He has authored the first edition of this book (Elsevier, 2009) as well as Designing Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More (Elsevier, 2012). He was the awardee of Stanford University's Walter J. Gores Award for Excellence in Teaching, and two-time recipient of the Stanford School of Medicine's Excellence in Teaching Award. He currently teaches courses at Williams in both Topics in Neuroscience as well as Neural Systems and Circuits.

Users Review

From reader reviews:

Cynthia Johnson:

Book is written, printed, or descriptive for everything. You can know everything you want by a reserve. Book has a different type. As you may know that book is important factor to bring us around the world. Beside that you can your reading ability was fluently. A publication Designing Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More will make you to possibly be smarter. You can feel considerably more confidence if you can know about every thing. But some of you think which open or reading the book make you bored. It is far from make you fun. Why they can be thought like that? Have you trying to find best book or appropriate book with you?

Glenna Monaghan:

Nowadays reading books become more than want or need but also work as a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The data you get based on what kind of guide you read, if you want get more knowledge just go with education and learning books but if you want really feel happy read one having theme for entertaining for example comic or novel. The actual Designing

Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More is kind of reserve which is giving the reader unpredictable experience.

Donald Jones:

Don't be worry if you are afraid that this book will probably filled the space in your house, you could have it in e-book technique, more simple and reachable. This kind of Designing Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More can give you a lot of pals because by you checking out this one book you have matter that they don't and make you more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that maybe your friend doesn't know, by knowing more than various other make you to be great men and women. So , why hesitate? We need to have Designing Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More.

Lorraine Joyner:

As we know that book is vital thing to add our know-how for everything. By a guide we can know everything we wish. A book is a pair of written, printed, illustrated or even blank sheet. Every year had been exactly added. This book Designing Science Presentations: A Visual Guide to Figures, Papers, Slides, Posters, and More was filled concerning science. Spend your spare time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading the book. If you know how big benefit of a book, you can truly feel enjoy to read a publication. In the modern era like today, many ways to get book you wanted.
