**Legendary oceanographer Dirk Pitt must work with his children to unravel old battle plans from WWII to prevent a present-day massacre in this novel in the #1 *New York Times*-bestselling adventure series.**

In the waning days of World War II, the Japanese tried a last desperate measure. Kept secret from all but a few select officials, two submarines were sent to the West Coast of the United States, their cargo a revolutionary new strain of biological virus, their mission to unleash hell.

Neither sub made it to the designated target. But that does not mean they were lost.

Someone knows about the subs and what they carried, knows too where they might be, and has an extraordinary plan in mind for the prize inside—a plan that could reshape America, and the world, as we know it. All that stands in the way are three people: a marine biologist named Summer, a marine engineer named Dirk . . . and their father, Dirk Pitt, the new head of NUMA.

Pitt has faced devastating enemies before, has even teamed up with his children to track them down. But never before has he encountered such pure evil—until now.

## Editorial Review

From Publishers Weekly

About halfway through this rip-snorting adventure thriller, a "white-haired man" rescues heroes Dirk Pitt Jr. and his sister, Summer, from death by drowning. That man is revealed to be author Cussler (*Trojan Odyssey*, etc.), reminding Dirk of "an older version of his own father," legendary oceanographer Dirk Pitt, hero of Cussler's previous novels. Just as the primary action baton is passed in this tale from Pitt Sr. to Jr., readers may note that Cussler's coauthor is his own son. But even if Cussler is beginning to pass on his writing baton, he's doing so with panache: thriller fans will revel in this action-packed yarn of land- and sea-based derring-do stuffed with technical details on matters from biochemical weapons "chimeras" to rocket launches. The villain is a South Korean industrialist working for the North Koreans with an eye toward unifying Korea by ridding the country of American troops, allowing for an invasion of the South. His plan is to aim a sea-borne rocket filled with a combo of deadly viruses at Los Angeles, with clues laying blame on Japanese terrorists, thus distracting America while the North makes its move. But villain and modus operandi matter less than the series of exciting hairbreadth escapes wrought by Dirks Jr. and Sr. and Summer—including Dirk Sr.'s escape from being poached alive in a minisub trapped underneath massive rocket boosters spewing an inferno of flames. There's a slight, nasty gloss of "yellow peril" on the villain and his actions, and it's only the Americans who greet likely death with a grin and a quip, but that's a minor knock on some major entertainment that's bound toward the top of the charts.

From School Library Journal

Adult/High School—Two Japanese submarines loaded with deadly chimera virus head for the west coast of the United States during the waning days of World War II but are sunk before ever endangering the coast. Sixty years later, South Korean industrialist Kang learns of their whereabouts and tests the deadly potion on some animals and a few people in Alaska. When the death reports start coming in, research sends Dirk Pitt, the younger; his sister; his crew from NUMA (National Underwater and Marine Agency); Dirk Pitt, the elder; and other forces on a race against time to prevent Kang from unleashing the virus. He dreams of creating a frenzy of blame between the countries for such an attack even as he takes joy in the fact that hundreds of thousands of Americans would die in agony. The Cusslers provide a high tide of ocean-based adventure and creepy bad guys. Featuring plenty of intense action, the plot fairly runs across the pages, with even the quieter moments full of intrigue. Lots of historical facts and science thread their way into the story, giving it a sense of realism. Filled with submarines, technical discussions on all sorts of ocean machinery, and some facts about chimera viruses, the novel provides some basic knowledge of bioterrorism. As always, the Pitts remain steadfast and true leaders, and the story leaves readers eager for their next adventure.—*Pam Johnson, Fairfax County Public Library, VA*

Here is yet another Cussler epic--his twenty-eighth, for those who are counting. And it is the eighteenth entry in the Dirk Pitt adventure series, this one coauthored by Cussler's son. The story begins toward the end of World War II, and the Japanese have sent two submarines to the West Coast of the U.S. They are carrying a lethal new strain of biological virus, but neither vessel makes it to the designated target. Then, in 2007, a number of sea-lion deaths are reported along the western Alaska Peninsula, and birds and people in the area become sick and die, although no known environmental catastrophe or human-induced culprit is suspected. Called to the scene is Dirk Pitt, the head of the National Underwater Marine Agency, and his two sons, one a marine biologist, the other a marine engineer. Their task is to locate and recover the two subs from the ocean

floor. There are the usual harrowing encounters, close calls, daring exploits, and--in the end--annihilation of the bad guys. Another win for NUMA. *George Cohen*
