By Allen I. Holub

Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C) By Allen I. Holub

Programmers, engineers, scientists, students, and others who work with C or C++: If you want to write better code without wading through a maze of technical material, this concise yet pithy guide is precisely the tool you need. Enough Rope to Shoot Yourself in the Foot offers well over 100 rules of thumb you can use to create elegant, maintainable code. And since it comes from an acknowledged expert in the field, you can't go wrong. Allen Holub provides an indispensable set of guidelines, tips, and techniques to help you use these extremely powerful languages to the fullest potential. But don't expect another dry programming guide. Holub manages to make a serious subject refreshingly readable by sprinkling the text with humor and insight.

Editorial Review

Review
Like other language guidebooks before it, *Enough Rope to Shoot Yourself in the Foot* is set up as a series of numbered guidelines or rules for better programming. It covers both C and C++, and delivers the booty from Holub's ongoing battle with these important languages.

The material in the book is about evenly divided between C and C++. Each section dispenses general design and programming philosophy, followed by more specific programming information (about specific language features). The advice about general programming and design is the best thing in a very good book; the rules are relevant to any programming language, are sensible, and have enduring value: "If you can't say it in English, you can't say it in C/C++." "A problem must be thought through before it can be solved."

Many of the tips in this book fall into the areas of "programming style" and "subtle interactions." Holub suspects that many programmers are out there writing buggy C++ code: Either they're using language features they don't really understand or they don't take the time to do a real object-oriented design. This puts them in danger of writing "unmaintainable gobbledygook." He doesn't believe in using C++ as a better C. If you're going to use C++, use it whole hog and do good object-oriented design. "If it's not object- oriented, use C," he says...Read more from this review. *--Doug Nickerson*, Dr. Dobb's Journal *-- Dr. Dobb's Journal*

Users Review

From reader reviews:

Marie Gambino:

What do you with regards to book? It is not important together with you? Or just adding material when you really need something to explain what you problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Every individual has many questions above. They must answer that question simply because just their can do that. It said that about guide. Book is familiar on every person. Yes, it is right. Because start from on guardería until university need that Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C) to read.

Gloria Eller:

Do you one among people who can't read satisfying if the sentence chained within the straightway, hold on guys this kind of aren't like that. This Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C) book is readable simply by you who hate those straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to supply to you. The writer associated with Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C) content conveys objective easily to understand by lots of people. The printed and e-book are not different in the information but it just different in the form of it. So , do you nonetheless thinking Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C) is not loveable to be your top listing reading book?

Anthony Brown:

The particular book Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C) will bring you to definitely the new experience of reading some sort of book. The author style to clarify the idea is very unique. If you try to find new book to learn, this book very acceptable to you. The book Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C) is much recommended to you to study. You can also get the e-book from your official web site, so you can more readily to read the book.

James Henderson:

In this era which is the greater man or who has ability to do something more are more special than other. Do you want to become among it? It is just simple method to have that. What you have to do is just spending your time almost no but quite enough to possess a look at some books. One of several books in the top record in your reading list is actually Enough Rope to Shoot Yourself in the Foot: Rules for C and C++ Programming (Unix/C). This book that is qualified as The Hungry Hills can get you closer in turning into precious person. By looking right up and review this publication you can get many advantages.
