Environmental Transitions: Transformation and Ecological Defense in Central and Eastern Europe By Petr Pavlínek, John Pickles

Environmental Transitions is a detailed and comprehensive account of the environmental changes in Central and Eastern Europe, both under state socialism and during the period of transition to capitalism. The change in politics in the late 1980s and early 1990s allowed an opportunity for a rapid environmental clean up, in an area once considered one of the most environmentally devastated regions on earth. The book illustrates how transformations after 1989 have brought major environmental improvements, as well as new environmental problems. It shows how environmental policy, economic change and popular support for environmental movements, have specific and changing geographies associated with them. Environmental Transitions addresses a large number of topics, including the historical geographical analysis of the environmental change, health impacts of environmental degradation, the role of environmental issues during the anti-communist revolutions, legislative reform and the effects of transition on environmental quality after 1989. Environmental Transitions contains detailed case studies from the region, which illustrate the complexity of environmental issues and their intimate relationship with political and economic realities. It gives theoretically informed ideas for understanding environmental change in the context of the political economy of state socialism and post-communist transformations, drawing on a wide body of literature from West, Central and Eastern Europe.

Editorial Review

Review

..."a gold mine of empirical and descriptive information. The connections that Pavlinek and Pickles draw between cultural values and economic and environmental issues is a major step in theorizing the mode of social regulation, which has been a black hole in regulationism for too long...quite possibly the best book on environment and governance in Eastern Europe. It provides a detailed picture of the condition of the environment, contributes an explicitly geographic perspective to the literature, and opens up new directions in the study of regimes of accumulation and modes of social regulation- Elizabeth Dunn, Dept. of Geography, University of Colorado, Boulder, CO."

Users Review

From reader reviews:

James Conner:

Have you spare time for a day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a move, shopping, or went to often the Mall. How about open as well as read a book entitled Environmental Transitions: Transformation and Ecological Defense in Central and Eastern Europe? Maybe it is to get best activity for you. You know beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with their opinion or you have various other opinion?

Manuel Britton:

What do you with regards to book? It is not important together with you? Or just adding material when you really need something to explain what your own problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Everybody has many questions above. They need to answer that question because just their can do which. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need this particular Environmental Transitions: Transformation and Ecological Defense in Central and Eastern Europe to read.

Archie Beard:

Exactly why? Because this Environmental Transitions: Transformation and Ecological Defense in Central and Eastern Europe is an unordinary book that the inside of the book waiting for you to snap that but latter it will distress you with the secret that inside. Reading this book alongside it was fantastic author who also write the book in such remarkable way makes the content interior easier to understand, entertaining method but still convey the meaning totally. So , it is good for you for not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book have such as help improving your proficiency and your critical thinking method. So , still want to delay having that

book? If I ended up you I will go to the guide store hurriedly.

Gerald Sosa:

Reading a book to become new life style in this season; every people loves to read a book. When you study a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, along with soon. The Environmental Transitions: Transformation and Ecological Defense in Central and Eastern Europe will give you new experience in reading through a book.
