Future Noir: The Making of Blade Runner By Paul M. Sammon

The 1992 release of the "Director's Cut" only confirmed what the international film cognoscenti have known all along: Ridley Scott's *Blade Runner*, based on Philip K. Dick's brilliant and troubling SF novel *Do Androids Dream of Electric Sheep*, still rules as the most visually dense, thematically challenging, and influential SF film ever made.

Future Noir is the story of that triumph.

The making of *Blade Runner* was a seven-year odyssey that would test the stamina and the imagination of writers, producers, special effects wizards, and the most innovative art directors and set designers in the industry.

A fascinating look at the ever-shifting interface between commerce and the art that is modern Hollywood, *Future Noir* is the intense, intimate, anything-but-glamorous inside account of how the work of SF's most uncompromising author was transformed into a critical sensation, a commercial success, and a cult classic.

But Paul M. Sammon does not only write about movies--he works in them as well. He first entered the industry as a publicist in the late 1970s, before moving on as a second-unit director, special effects coordinator, still photographer, electronic press kit producer, and Vice President of Special Promotions. Some of the scores of motion pictures on which Sammon has labored include *RoboCop*, *Platoon*, *Blue Velvet*, *Conan the Barbarian*, and *The Silence of the Lambs*.

By the late 1980s, Sammon was working in Japanese television, where he coproduced popular entertainment programs like *Hello! Movies* for the TV Asahi network. By the 1990s, Sammon had served as Computer Graphics Supervisor for *RoboCop 2*; he recently was Digital and Optical Effects Supervisor for 1995's *XTRO: Watch the Skies*.

Despite this background, however, Sammon still likes nothing better than sitting down with a good movie. And *Blade Runner* remains one of his favorite films.
