
Laser Additive Manufacturing of High-Performance Materials

By Dongdong Gu

Laser Additive Manufacturing of High-Performance Materials By Dongdong Gu

This book entitled “Laser Additive Manufacturing of High-Performance Materials” covers the specific aspects of laser additive manufacturing of high-performance new materials components based on an unconventional materials incremental manufacturing philosophy, in terms of materials design and preparation, process control and optimization and theories of physical and chemical metallurgy. This book describes the capabilities and characteristics of the development of new metallic materials components by laser additive manufacturing process, including nanostructured materials, *in situ* composite materials, particle reinforced metal matrix composites, etc. The topics presented in this book, similar as laser additive manufacturing technology itself, show a significant interdisciplinary feature, integrating laser technology, materials science, metallurgical engineering and mechanical engineering. This is a book for researchers, students, practicing engineers and manufacturing industry professionals interested in laser additive manufacturing and laser materials processing. Dongdong Gu is a Professor at College of Materials Science and Technology, Nanjing University of Aeronautics and Astronautics (NUAA), PR China.

Dongdong Gu is a Professor at College of Materials Science and Technology, Nanjing University of Aeronautics and Astronautics (NUAA), PR China.

About the Author
Prof. Dr. Dongdong Gu is a professor of the College of Materials Science and Technology, Nanjing University of Aeronautics and Astronautics.

Users Review

From reader reviews:

Lisa Jennings:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each guide has different aim or even goal; it means that publication has different type. Some people sense enjoy to spend their the perfect time to read a book. They can be reading whatever they have because their hobby is usually reading a book. Consider the person who don't like studying a book? Sometime, man or woman feel need book if they found difficult problem or perhaps exercise. Well, probably you will want this Laser Additive Manufacturing of High-Performance Materials.

Mindy Munson:

This Laser Additive Manufacturing of High-Performance Materials are reliable for you who want to certainly be a successful person, why. The reason of this Laser Additive Manufacturing of High-Performance Materials can be one of the great books you must have is definitely giving you more than just simple looking at food but feed you with information that possibly will shock your prior knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed types. Beside that this Laser Additive Manufacturing of High-Performance Materials giving you an enormous of experience for example rich vocabulary, giving you test of critical thinking that we know it useful in your

day pastime. So , let's have it and enjoy reading.

Clyde Connell:

Reading a e-book tends to be new life style on this era globalization. With reading you can get a lot of information that could give you benefit in your life. Using book everyone in this world can easily share their idea. Publications can also inspire a lot of people. A lot of author can inspire their reader with their story or perhaps their experience. Not only the storyplot that share in the ebooks. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors these days always try to improve their talent in writing, they also doing some exploration before they write to the book. One of them is this Laser Additive Manufacturing of High-Performance Materials.

Awilda Kell:

Reading can called brain hangout, why? Because if you find yourself reading a book specially book entitled Laser Additive Manufacturing of High-Performance Materials your thoughts will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely might be your mind friends. Imaging every word written in a publication then become one application form conclusion and explanation that will maybe you never get prior to. The Laser Additive Manufacturing of High-Performance Materials giving you a different experience more than blown away the mind but also giving you useful information for your better life within this era. So now let us present to you the relaxing pattern at this point is your body and mind is going to be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?
