Neufert Architects' Data, Third Edition By Ernst Neufert, Peter Neufert

Architects' Data

- * **Provides a vast amount of design data for all the main building types**
- * **Includes over 6000 diagrams packed full of data**
- * **Is 40% larger than the previous edition, with over 3000 more illustrations**
- * **Contains substantially expanded sections on building components, services, heating, lighting and sound**
- * **Introduces completely new sections on thermal insulation, solar architecture, fire protection and means of escape, designing for the disabled, and refurbishment and renovation**

Architects' Data provides an essential reference for the initial design and planning of a building project. Organized largely by building type, and with over 6000 diagrams, it provides a mass of data on spatial requirements and also covers planning criteria and considerations of function and siting.

Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. There are substantial new sections on:

- * building components
- * services
- * heating
- * lighting
- * thermal and sound insulation
- * fire protection
- * designing for the disabled

An extensive bibliography and a detailed set of metric/imperial conversion tables are included.

Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 35 editions and many translations. This Third Edition of the English language version has been revised for the first time in 20 years and completely reworked, with 40% more material,

to provide a major new edition for an international readership.

Editorial Review

Review

"Neufert's Architects' Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs. "

Cesar Pelli, Architect

"With this thorough rewrite, Neufert has produced, yet again, an invaluable reference book. Ideal for students specifically, and hard-pressed architects generally, this is a great source book for the basics."

The Architects' Journal

Language Notes

Text: English (translation)

Original Language: German

From the Back Cover

Architects' Data is an essential aid in the initial design and planning of a building project. Organised largely by building type (from airports to zoos), it covers user requirements, planning criteria, basic dimensions and considerations of function and siting.

There are additional sections on building components, services and building physics, fire protection, and designing for the disabled.

Most illustrations are dimensioned, and each building type includes plans, sections, site layouts and design details. There is a detailed set of metric/imperial conversion units and an extensive bibliography.

Users Review

From reader reviews:

Eric Overbay:

The actual book Neufert Architects' Data, Third Edition will bring someone to the new experience of reading some sort of book. The author style to spell out the idea is very unique.
