Research Handbook on Crisis Management in the Banking Sector (Research Handbooks in Financial Law series) By Matthias Haentjens, Bob Wessels

'This volume is the definitive work on banking sector crisis management. It covers all recent legislative developments and it provides cognate analysis by leading experts on matters covering the whole spectrum of bank crisis management, ranging from early intervention and provision of emergency liquidity assistance by the central bank to group resolution and the workings of the Single Resolution Mechanism. Additionally, country reports of all major jurisdictions such as Australia, the US, UK, Germany, Japan and China provide comprehensive overviews of the current state. It will prove an invaluable companion to all those seeking to demystify this most complex area of legal and regulatory practice.'

- Emiliós Avgouleas, University of Edinburgh, UK

In this timely *Handbook*, over 30 prominent academics, practitioners and regulators from across the globe provide in-depth insights into an area of law that the recent global financial crisis has placed in the spotlight: bank insolvency law.

Research Handbook on Crisis Management in the Banking Sector discusses the rules that govern a bank insolvency from the perspectives of the various parties that are affected by these rules. Thus, whilst many bank insolvency rules have been enacted only recently and their application is still clouded by a host of uncertainties, this book takes the perspectives of the relevant authorities, of the bank and of the bank's counterparties.

Providing a comprehensive approach to crisis management in the banking sector, this *Handbook* will prove a valuable resource for academics, postgraduate students, practitioners and international policymakers.
