Mathematical Ideas (12th Edition) By Charles D. Miller, Vern E. Heeren, John Hornsby

ALERT: This is a **standalone book** and does not contain an access code. If you would like to purchase the version with the Access Card Package please visit: <http://www.amazon.com/dp/0321759915>

What does your math course have to do with the latest TV shows or Hollywood movies? Plenty—if you're using the right text. **Mathematical Ideas, Twelfth Edition** brings the best of Hollywood into the classroom through descriptions of video clips from popular cinema and television. Well-known author John Hornsby's innovative approach is enhanced with great care in this revision, and refined to serve the needs of you and your instructor. Streamlined and updated, it offers a modernized design, new bubble pointers for Example annotations, and much more. It retains the consistent features, friendly writing style, clear examples, and exercise sets for which this text is known.

Editorial Review

About the Author

Charles Miller has taught at America River College for many years.

Vern Heeren received his bachelor's degree from Occidental College and his master's degree from the University of California, Davis, both in mathematics. He is a retired professor of mathematics from American River College where he was active in all aspects of mathematics education and curriculum development for thirty-eight years. Teaming with Charles D. Miller in 1969 to write *Mathematical Ideas*, the pair later collaborated on *Mathematics: An Everyday Experience*; John Hornsby joined as co-author of *Mathematical Ideas* on the later six editions. Vern enjoys the support of his wife, three sons, three daughters in-law, and eight grandchildren.

John Hornsby: When a young John Hornsby enrolled in Louisiana State University, he was uncertain whether he wanted to study mathematics education or journalism. Ultimately, he decided to become a teacher. After twenty five years in high school and university classrooms, each of his goals has been realized. His passion for teaching and mathematics manifests itself in his dedicated work with students and teachers, while his penchant for writing has, for twenty five years, been exercised in the writing of mathematics textbooks. Devotion to his family (wife Gwen and sons Chris, Jack, and Josh), numismatics (the study of coins) and record collecting keep him busy when he is not involved in teaching or writing. He is also an avid fan of baseball and music of the 1960's. Instructors, students, and the 'general public' are raving about his recent *Math Goes to Hollywood* presentations across the country.

Users Review

From reader reviews:

John Glass:

In this 21st hundred years, people become competitive in most way. By being competitive today, people have do something to make these survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. Sure, by reading a publication your ability to survive enhance then having chance to remain than other is high. In your case who want to start reading a new book, we give you this kind of *Mathematical Ideas (12th Edition)* book as beginning and daily reading e-book. Why, because this book is usually more than just a book.

Nancy Jackson:

The knowledge that you get from *Mathematical Ideas (12th Edition)* may be the more deep you excavating the information that hide in the words the more you get interested in reading it. It doesn't mean that this book is hard to understand but *Mathematical Ideas (12th Edition)* giving you enjoyment feeling of reading. The writer conveys their point in specific way that can be understood by means of anyone who read that because the author of this guide is well-known enough.
